

<b>Program Educational Objectives (PEOs) for UG Program in Civil Engineering</b>	
PEO1	To prepare students to get employment, profession and/or to pursue Post graduation and research in civil engineering discipline in particular and allied engineering disciplines in general.
PEO2	To provide students a solid foundation in mathematical, scientific and engineering fundamentals required to formulate, analyse and solve civil engineering related problems.
PEO3	To prepare the students to acquire the knowledge in breadth in order to solve mathematical problems related to analysis and design of various systems pertaining to Civil Engineering Infrastructure in order to utilize their skills to prepare cost estimates and activities related to Civil Engineering projects.
PEO4	To inculcate ethical practices in students and to establish understanding of professionalism, safety, sustainability, their duties and contribution to the society.
PEO5	To provide students with academic environment that makes them aware of excellence and to enable them to understand the significance of life-long learning in global perspective.
